1 oz. Item #111-1-color code

TIP

Mehron's Liquid Makeup has been used successfully as an airbrush makeup. Makeup artists report that slightly diluting Liquid Makeup with either Barrier Spray, Mixing Liquid or distilled water gives the product a nice fluid consistency that works well in most models of airbrush equipment.

You may need to perform some "trial and error" tests to achieve just the right viscosity of makeup along with adjusting the airbrush pressure. Once you have zeroed in on the right combination, you should get optimal results.

As a bonus benefit, using Barrier Spray™ will increase the longevity of your airbrush designs.
